MyTherapy is the leading digital adherence program, with thousands of active users across the globe. We are helping a wide range of patients by reminding them to take their medication and to amend a healthy lifestyle.

We are looking to fill the following position at our Warsaw office:
Senior Backend Developer (Python/Django) (f/m)

Our experienced development team creates all app components in-house – from database management and UI/UX design to the mobile frontends. We are agile and strongly believe in the Scrum approach, where flexibility and team interactions beat strict processes and supervision.

Why us?

- We work within a team of senior developers
- We shape the product together with internal product owner and graphic designers
- We prioritize quality over speed and do thorough code reviews
- We have autonomy in solving problems, choosing tools, implementing workflows, etc.

Your Profile:

- 3+ years of commercial software development experience
- Solid software engineering skills (degree) incl. data structures, algorithms and design patterns
- Familiar with Python, Django and the Django REST framework
- Interested in Amazon Web Services, Ubuntu and MySQL
- Knowledge of continuous integration and orchestration tools (e.g. Fabric, Jenkins)
- Experience with debugging, debottlenecking and security improvements

If you have a Stack Overflow, GitHub profile or similar projects, we encourage you to forward them along with other points of reference.

Want to find out more about what we do, why we love doing it, and how you could contribute? Check out our webpage www.mytherapyapp.com or download our app in the [Google Play Store](#) or [Apple App Store](#). If you're interested just contact us at jobs@smartpatient.eu – Come and join our team!
