

SOFTWARE ENGINEER MOBILE DEVELOPER m/f ANDROID

APPLY NOW

**while!
(succeed = try());**

MyTherapy is the leading digital adherence program, with thousands of active users across the globe. We are helping a wide range of patients by reminding them to take their medication and to amend a healthy lifestyle.

We are looking to fill the following position at our Warsaw office:
Software Engineer/Mobile Developer (Android) (f/m)

Our experienced development team creates all app components in-house – from database management and UI/UX design to the mobile frontends. We are agile and strongly believe in the Scrum approach, where flexibility and team interactions beat strict processes and supervision.

Why us?

- We work within a team of senior developers
- We shape the product together with internal product owner and graphic designers
- We prioritize quality over speed and do thorough code reviews
- We have autonomy in solving problems, choosing tools, implementing workflows, etc.
- We follow Material Design guidelines
- We use MVP and believe in Architecture Components

Your Profile:

- 2+ years of experience in mobile platforms
- Bachelor's or Master's degree in computer sciences or related fields
- A great interest in Kotlin, Java and OOP & knowledge of Legacy Android API

- Proficient in common database technologies
- Experience with version control systems like GIT/SVN and software testing tools (e.g. Mockito, Espresso)
- Practical knowledge of HTTP and RESTful web services, authorization systems (e.g. OAuth), offline synchronization, and mobile security concepts
- Experience and affinity for agile and TDD environments, especially SCRUM
- Strong oral and written communication skills in English

If you have a Stack Overflow or GitHub profile (or similar), we encourage you to forward them along with other points of reference such as published apps on Play Store or contributions to open source projects.
